Project Title	AI Enabled Candidate Resume Screening
Maximum Marks	2 Marks

Data Quality Report Template

The Data Quality Report Template will summarize data quality issues from the selected source, including severity levels and resolution plans. It will aid in systematically identifying and rectifying data discrepancies.

Data Source	Data Quality Issue	Severity	Resolution Plan
Resume1	Resumes are often submitted in various formats (e.g., PDF, Word, HTML) with inconsistent structures, such as varying header styles, font sizes, and section arrangements.	High	Use libraries such as PyPDF2 (for PDFs) or python-docx (for Word documents) to extract text and then remove formatting inconsistencies. Apply OCR tools like Tesseract for image-based resumes and extract only the text data to eliminate layout-related inconsistencies.
Resume2	Resumes may contain spelling mistakes or grammatical errors, especially in candidate names, skills, or job titles.	low	Use libraries like PySpellChecker , TextBlob , or Hunspell to automatically identify and correct common spelling mistakes.
