Team ID	739938
Project Title	AI Enabled Candidate Resume Screening
Maximum Marks	2 Marks

Data Collection Plan & Raw Data Sources Identification Template

Elevate your data strategy with the Data Collection plan and the Raw Data Sources report, ensuring meticulous data curation and integrity for informed decision-making in every analysis and decision-making endeavor.

Data Collection Plan Template

Section	Description
Project Overview	The primary goal of this project is to develop an AI-driven resume screening system that automates the process of reviewing and shortlisting candidates based on their resumes. The system leverages machine learning (ML) and natural language processing (NLP) techniques to analyze resumes, identify key skills, experience, and qualifications, and compare them with job requirements. The objective is to reduce the time and effort required by HR professionals in manual screening, improve candidate selection accuracy, and enhance the overall recruitment process.
Data Collection Plan	The goal of this data collection plan is to gather a diverse and high-quality dataset of resumes and job descriptions to train, test, and evaluate an AI-powered candidate resume screening system. The dataset should include various resume formats, industries, job titles,

	skills, and experiences to ensure the model generalizes well across different use cases.
Raw Data Sources Identified	LinkedIn: Publicly available LinkedIn profiles (with permission) provide resume-like data including skills, education, job history, and endorsements. Indeed: Users often post resumes and cover letters on Indeed, which can be used for analysis if made publicly available. HR Databases: Companies' internal databases can provide real-world resumes from previous applications, which are valuable for training AI models.

Raw Data Sources Template

Source Name	Description	Location/URL	Format	Size	Access Permissions
Resume 1	It consists of skills needed for java developer	canva	pdf	73KB	Public
Resume 2	It consists of skills related to python developer	canva	pdf	73KB	Private (with access)
